

TLH

- Excellent induction
- Versatile positioning
- Suitable as a ceiling, wall and riser diffuser
- Installed directly in ductwork or groove – no tools required

APPLICATION

TLH is a basic supply diffuser for wall, ceiling or riser installation.

Design

TLH features a perforated front and a connection collar fitted with a wide rubber gasket for installation directly in duct or groove without additional fastening devices.

DESCRIPTION

Materials and surfaces

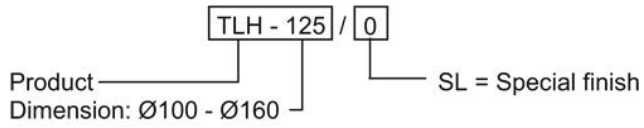

TLH is made of steel, and comes in a RAL 9003 - gloss 30 finish with EPDM rubber gasket fitted as standard.

INSTALLATION

TLH is installed directly in to duct as shown in fig. 3 or in groove with an equivalent inside diameter, and is secured by using a press-and-twist method. The diffuser is removed by reversing the action, i.e. twist and pull.
